SUMMARY

Having more than 5 years of experience in the field as a Frontend and Fullstack developer, I've worked on important projects in every phase of the software development lifecycle, from business requirements collection to project delivery. Through the code, I always try to add value to the company being aware of the company's perspectives and goals.

ACHIEVEMENTS

1. Led a team of 4 Frontend developers and increased the amount of tasks delivered by the team by 25% per Sprint
2. Incremented the developers productivity by 10% by creating automated tools and by writing detailed documentation
3. Identified performance issues and cut down the screen render time by four times, also reducing overfetch
4. Given talks to a large community. Also helped 5 other people from coding basics to mid-level
5. Had participate of programming marathons at college and have won one local contest among 10 other teams
